JOB DESCRIPTION

Technical Consultant, Software & AI Engineering

Remote (India) · Full-time · 3 PM – 12 AM IST · 2+ years' experience (1+ in AI/ML)

About the role

This is a role with Arjun Thakur's practice, working with a staffing firm in the San Francisco Bay Area as its technical consultant. Talk to hiring companies about the engineers they need, from traditional full-stack and backend development to AI engineering, and help design upskilling programs for engineers aiming for high-paying software and AI engineering jobs.

Responsibilities

- Talk to hiring companies (the firm's clients) about their staffing requirements, on calls and in writing
- Cover the full range: traditional full-stack and backend development, AI engineering, agentic AI, RAG, evals, and LLMs
- Turn each requirement into a clear role profile: skills, seniority, tech stack, and what to test for
- Help design upskilling programs for engineers who want high-paying software engineering and AI engineering jobs: curriculum, hands-on projects, and interview prep
- Stay current on AI engineering so client conversations stay credible

Requirements

- 2+ years of professional experience as a full-stack or backend software engineer, or an AI/ML engineer
- At least 1 year of hands-on AI/ML experience (for example LLM apps, RAG, agents, or ML models) as part of that
- **Excellent English, both spoken and written**
- Strong communication skills: comfortable talking to US clients about their hiring needs
- Working knowledge of LLMs, RAG, agentic AI, and evals
- Solid grounding in full-stack and backend development: APIs, databases, cloud, and system design
- Able to explain technical trade-offs clearly to engineers and non-technical people alike
- Self-driven: you work independently, without hand-holding

Nice to have

- Built or shipped an LLM-powered application (RAG, agents)

- Experience interviewing or hiring engineers
- Experience mentoring, teaching, or creating technical content
- Worked with US clients or US teams

Location & hours

- **Remote**, from anywhere in India
- Full-time, **3 PM – 12 AM IST** (overlaps with the US Pacific morning)
- Start: immediate

Pay

- **₹40,000 / month**

How to apply

1. Email hello@arjunthakur.dev with this exact subject line: **Technical Consultant | Your Name**
2. In the email, write 3–4 lines about yourself: current role, years of experience, and main stack. Attach your resume and add your LinkedIn profile.
3. We'll email a short task to shortlisted candidates.

Please don't call or WhatsApp. Applications are accepted by email only. Emails without the subject line above may be missed.
